

■ Do-It Services — Scope Audit Report

Prepared by: Automated Codebase Analyzer
Date: 23 June 2026
Codebase Revision: f59b042 (main branch)

■ Source Documents Analyzed

#	Document	Key Content
1	agreement_do-it.pdf	Annexure A — Project Scope & Deliverables (6 pages)
2	doitservices_quotation.pdf	Pricing + 5-Phase Implementation Plan
3	features.txt	Push Notification requirement (Web Push API)
4	requirements_hinglish.txt	Business workflow description + admin "kitne lene" screen
5	e2eq3212qe312e123q.jpeg	Admin Dashboard Feature Breakdown Diagram
6	WhatsApp Image	Staff Collection Entry Wireframe (Screens 1–4)

1. ■ Total Features PRESENT in Codebase

Below is an exhaustive inventory of all functionalities that **actually exist** in the current codebase.

A. Authentication & Access Control

#	Feature	Evidence
1	Separate login for Admin & Staff (phone + password)	auth.py
2	Secure password hashing (bcrypt)	security.py
3	JWT Access Token + HttpOnly Refresh Cookie	auth.py#L50-L63
4	Token refresh (rotation) mechanism	auth.py#L74-L139
5	Role-based middleware (require_admin , require_staff , require_any_user)	dependencies.py
6	Logout (cookie purge)	auth.py#L142-L146

7	<code>/auth/me</code> — current user profile endpoint	auth.py#L150-L153
---	---	-------------------

B. Admin Dashboard

#	Feature	Evidence
8	Admin Overview — Today's total collections	reports.py#L137-L183
9	Admin Overview — Active staff count (checked-in today)	Same endpoint
10	Admin Overview — Pending deposit verification count	Same endpoint
11	Admin Overview — Pending collection verification count	Same endpoint
12	Full Desktop Admin Dashboard (12 tabs)	OverviewTab.tsx
13	Responsive Mobile Admin Layout (8 mobile components)	MobileOverview.tsx

C. Staff Dashboard

#	Feature	Evidence
14	Staff home screen: today's collections/deposits summary	staff/page.tsx
15	Daily collection summary (today collected, today deposited, net balance)	staff/page.tsx#L490-L542
16	Denomination-wise cash-in-hand breakdown	reports.py#L186-L291
17	Staff Daily Report page (PDF downloadable)	daily-report/page.tsx

D. Retailer & Store Management

#	Feature	Evidence
18	Add / Edit / Delete retailers	retailers.py
19	Retailer contact information (name, phone, email, address)	models.py#L52-L77
20	Stores under retailers (CRUD)	Store model
21	Retailer categories/classification	models.py#L63

22	Opening balance (To Give / To Take) for retailers	models.py#L66-L68
23	Admin RetailersTab — view, search, filter, edit, delete retailers	RetailersTab.tsx (60KB)
24	Mobile Retailers view	MobileRetailers.tsx (69KB)
25	Generate online ledger links for retailers (public URL, no login)	reports.py#L15-L134
26	Live public retailer ledger page	staff/ledger/page.tsx

E. Portal Management

#	Feature	Evidence
27	Portal Groups (e.g., Muthoot, Blinkit) with opening balances	PortalGroup model
28	Individual Portals under groups (bank accounts)	Portal model
29	Manage portal bank accounts (add, edit, delete portals/banks)	portals.py (26KB)
30	View portal-wise deposits & balances	PortalsTab.tsx (62KB)
31	Mobile Portals view	MobilePortals.tsx (60KB)
32	Portal <code>show_in_online_payment</code> toggle (for staff UPI flow)	models.py#L102

F. Staff Attendance & Tracking

#	Feature	Evidence
33	Daily check-in / check-out	attendance.py
34	GPS location capture during check-in/out	models.py#L149-L152
35	Vehicle meter reading entry (start KM / end KM)	models.py#L140-L141
36	Vehicle meter photo upload (with GPS watermark)	staff/page.tsx#L582-L673
37	Odometer images stored on Cloudflare R2	r2.py
38	Late attendance detection (configurable threshold)	models.py#L155-L157

39	Late penalty system (amount, admin approval/rejection)	admin_settings.py#L83-L117
40	Admin Attendance Tab (view all attendance records)	AttendanceTab.tsx (30KB)

G. Collection & Deposit Management

#	Feature	Evidence
41	Cash collection entries (staff → from store/retailer)	collections.py (38KB)
42	Staff collection entry page (select retailer → store → amount)	collection/page.tsx (32KB)
43	UPI/online payment entries (online_amount in denomination)	models.py#L227
44	Cash denomination counting (₹500, ₹200, ₹100, ₹50, ₹20, ₹10, coins)	Denomination model
45	Deposit/Payout system — Option A: Give to Portal (bank deposit)	deposits.py (30KB), deposit_type="portal"
46	Deposit/Payout system — Option B: Give to Retailer	deposit_type="retailer"
47	Deposit/Payout system — Option C: Handover to Staff or Office	deposit_type="staff", to_office=True
48	Staff deposit entry page	deposit/page.tsx (28KB)
49	Admin Collections Tab (view, filter, verify, edit, delete)	CollectionsTab.tsx (38KB)
50	Admin Deposits Tab (view, filter, verify, edit, delete, mark processed)	DepositsTab.tsx (39KB)
51	Collection verification by admin (triggers ledger + email simulator)	collections.py#L341-L399
52	Deposit verification by admin	deposits.py
53	Running balance & ledger tracking (per retailer)	Ledger model

H. Reports & Statements

#	Feature	Evidence
54	Admin Reports Tab (basic report framework)	ReportsTab.tsx

55	Retailer Ledger Tab (full ledger with filtering)	LedgerTab.tsx (75KB)
56	Staff daily summary report (opening/closing balance)	reports.py#L294-L357
57	Staff ledger (chronological cash in/out history)	reports.py#L360-L518
58	PDF statement download (staff daily report)	daily-report/page.tsx — uses html2pdf.js
59	Share collection/deposit receipt via WhatsApp/clipboard	shareHelper.ts

I. Technical / PWA

#	Feature	Evidence
60	Progressive Web App (installable)	manifest.ts + usePWAInstall.ts
61	Offline support (Dexie/IndexedDB for collections & deposits)	db.ts
62	Background sync engine (auto-upload on reconnect)	sync.ts
63	Zustand state management (persist sessions)	store.ts
64	Mobile-responsive design (device hook)	useDevice.ts
65	Dark mode / Light mode toggle	staff/page.tsx#L52

2. ■ Missing Features (Pending from Original Scope)

These features were explicitly agreed upon in the original documents but are **NOT yet implemented** in the codebase.

#	Missing Feature	Source Document	Severity
M1	Push Notifications (Web Push API) — Admin: 'New Collection Submitted', 'Staff Synced Data', 'Large Collection Recorded'. Staff: 'New Retailer Assigned', 'Urgent Admin Update'.	features.txt	■ HIGH

M2	Email sending to retailers — On collection submit, email with ledger link should be sent. Currently only "SMTP EMAIL DISPATCH SIMULATOR" (console.log print). No actual SMTP/email service implemented.	Agreement Annexure A \$2.E + Quotation \$Email Integration (■3500)	■ HIGH
M3	Excel report exports — Agreement says "Excel report exports". No Excel generation exists anywhere in backend or frontend.	Agreement Annexure A \$2.F	■ MEDIUM
M4	Staff Attendance Reports — Dedicated attendance reporting module (beyond the attendance tab view). E.g., monthly attendance summary, KM traveled reports.	Agreement Annexure A \$2.F	■ MEDIUM
M5	Custom date range filtering for Reports & Analytics (as a dedicated reports feature). ReportsTab.tsx is only 9KB — a skeleton compared to other tabs.	Image: Admin Dashboard diagram (Reports & Analytics section)	■ MEDIUM
M6	Collections breakdown report (portal/retailer/staff breakdown)	Image: Admin Dashboard diagram	■ MEDIUM
M7	Deposit breakdown report (portal/retailer/staff breakdown)	Image: Admin Dashboard diagram	■ MEDIUM
M8	Cash-out reports (portal-wise, retailer-wise, staff-wise)	Image: Admin Dashboard diagram	■ MEDIUM
M9	Staff collection summary report	Image: Admin Dashboard diagram	■ MEDIUM
M10	Ledger summary (all retailers summary view)	Image: Admin Dashboard diagram	■ MEDIUM
M11	Staff performance overview — A dedicated performance view for admin to assess staff productivity.	Image: Admin Dashboard diagram (Staff Management section)	■ LOW
M12	Assigned retailers display on staff dashboard — Staff should see their assigned retailers/stores. Currently no filtering by <code>assigned_staff_id</code> .	Agreement Annexure A \$2.B (Staff Dashboard)	■ LOW

■■ WARNING

M1 (Push Notifications) and **M2 (Email Integration)** are the most critical missing features. Email integration was explicitly priced at ■3,500 in the quotation. Push notifications were a separately documented requirement.

3. ■ Extra Features (Scope Creep — NOT in Original Documents)

These features exist in the codebase but were **NOT mentioned** in ANY of the original scope documents (agreement, quotation, features.txt, requirements, or diagrams).

#	Extra Feature	Evidence	Impact
E1	Multi-Tenant Architecture (SaaS) — Entire system redesigned as a multi-tenant SaaS platform with isolated databases per tenant. Completely outside original scope which was for a single "Do-It Services" business.	master_models.py, db.py — Tenant model, tenant sessions, per-tenant DB creation	■ MAJOR
E2	Super Admin Panel — A full separate frontend + backend module for managing tenants (CRUD), not in any original document.	super_admin.py (409 lines), superadmin-frontend/ (entire app), frontend superadmin page (46KB)	■ MAJOR
E3	Cloudflare DNS Auto-Provisioning — Automatic DNS A-record creation/deletion for each new tenant subdomain on Cloudflare.	super_admin.py#L23-L78	■ MAJOR
E4	Virtual Transfer / Wallet System — Admin can transfer virtual balance between Portals ↔ Retailers ↔ Staff. Entirely new financial module.	admin_settings.py#L119-L298, WalletTransferTab.tsx (39KB), VirtualLedgerTab.tsx (68KB)	■ MAJOR
E5	Staff Virtual Balance — Each user/staff has a <code>virtual_balance</code> field, enabling a money-wallet concept.	models.py#L30	■ SIGNIFICANT
E6	Maintenance Mode System — Per-tenant maintenance mode toggle that blocks non-admin login. Dedicated maintenance page on frontend.	master_models.py#L16, maintenance/page.tsx	■ SIGNIFICANT

E7	WhatsApp Business API Integration — Service module for sending WhatsApp template messages via Meta Graph API.	whatsapp.py (78 lines)	■ SIGNIFICANT
E8	Cloudflare R2 Object Storage — Cloud image storage for odometer photos (instead of local filesystem). Including auto-cleanup script for 2-month old images.	r2.py, delete_old_attendance_images.py	■ SIGNIFICANT
E9	Staff-to-Staff Cash Handover — Option C deposit type where one staff can hand cash to another staff member (not just Portal/Retailer/Office). Includes <code>from_staff_id</code> on Collection for received handovers.	models.py#L186, models.py#L246	■ SIGNIFICANT
E10	Collection from Office — <code>from_office</code> flag on Collection model allowing internal money disbursement.	models.py#L187	■ MINOR
E11	Per-Staff Custom Late Policy — Individual staff can have custom <code>late_threshold</code> , <code>late_penalty</code> , <code>auto_checkout_time</code> overriding global settings.	models.py#L33-L36	■ MINOR
E12	Auto-Checkout System — System auto-checks-out staff at a configurable time (default 20:00).	BusinessSettings.auto_checkout_time	■ MINOR
E13	Entry Edit/Delete Time Windows — Configurable time limit (in minutes) for staff to edit/delete their own entries. Admin can set to permanent (-1).	BusinessSettings, AdministrationTab.tsx#L475-L549	■ MINOR
E14	Opening Cash in Hand — Global configurable opening cash balance for "Net Cash in Hand" indicator.	BusinessSettings.opening_cash_in_hand, AdministrationTab.tsx#L551-L587	■ MINOR
E15	Collection Share via WhatsApp — Rich share receipts (denomination-wise) using Web Share API or clipboard fallback. Number-to-words conversion (Indian).	shareHelper.ts	■ MINOR

E16	Staff Cash-In Ledger & Cash-Out Ledger — Separate staff ledger pages for drill-down.	staff/cash-in-ledger/, staff/cash-out-ledger/	■ MINOR
E17	CMS Retailer Auto-Seeding — Automatic creation of a "CMS" retailer during startup.	main.py#L52-L66	■ MINOR
E18	Database Migration Logic — Historical ledger date correction and schema migration on startup.	migration.py, main.py#L96-L127	■ MINOR
E19	Custom Welcome Page — A separate welcome/landing page.	welcome/page.tsx	■ MINOR
E20	History Page — Dedicated transaction history page.	history/page.tsx (13KB)	■ MINOR
E21	Alembic Database Migration System — Full Alembic migration setup.	alembic/	■ MINOR
E22	Database Backup to R2 — PostgreSQL backup script that uploads to Cloudflare R2.	backup_postgres_r2.sh	■ MINOR
E23	Balance Recalculation Logic — Automatic ledger balance recalculation to ensure consistency.	ledger.py	■ MINOR

■ Summary Dashboard

Scope Creep Severity Breakdown

Severity	Count	Items
■ MAJOR (entire new modules)	4	E1, E2, E3, E4
■ SIGNIFICANT (notable additions)	5	E5, E6, E7, E8, E9
■ MINOR (small additions/tweaks)	14	E10–E23

■ Key Takeaways

■ CAUTION

The 4 MAJOR Scope Creep Items The following 4 items represent the ****biggest scope deviations**** — each is an entire new module/system that was never part of the original agreement: 1. ****Multi-Tenant SaaS Architecture (E1)**** — The entire database layer was restructured for multi-tenancy with isolated DBs per tenant 2. ****Super Admin Panel (E2)**** — A full separate application for managing tenants 3. ****Cloudflare DNS Auto-Provisioning (E3)**** — Infrastructure automation for tenant subdomains 4. ****Virtual Transfer/Wallet System (E4)**** — A complete financial module with ~107KB of frontend code

■ IMPORTANT

Missing Items That Were Paid For - ****Email Integration**** was quoted at ■3,500 and is only a simulator (print statements) - ****Push Notifications**** were a separately documented feature requirement - ****Reports & Analytics**** section in the quotation was priced at ■6,000 but the ReportsTab is currently a minimal 9KB skeleton — most sub-reports (M5–M10) are not implemented

This report was generated by auditing every router, model, component, and utility file in the codebase against the 6 original scope documents.
